

ESA mentorship program: Mentee's Application form

General information

Full name of applicant:

Affiliation:

Current position:

Country:

Date of birth:

Name of ESA sponsor

Reasons for application (100 words maximum)

Please provide your motivation why you want to join the mentorship program and what would make you a good candidate.

Main goals for mentorship program (100 words maximum)

Please describe the main goals you want to achieve by the mentorship program. This can range from the submission of your first abstract at an ESA meeting or potentially gaining a full ESA membership, depending on your current surgical/academic experience.

Example 1 : I'm a young surgeon interested in esogastric surgery with an academic project focused on esophageal cancer. My center already has a significant activity in this field, but I'd like to be able to have another experience in the field, a foreign one, to give me an international experience and take a step back from my daily practice. I'd also like to take part in an international scientific project, a multicenter study, for which I already have proposals that I'd like to propose to my ESA mentor in collaboration with my local mentor.

Example 2: I'm a young surgeon interested in transplantation but also in pedagogy, and I'd like to develop and improve our teaching offer through simulation. The best way to do this would be to draw inspiration directly from a successful project, while adapting it to our possibilities and needs. I already have experience in this field and would like to start a collaboration between our faculty and other international ones, especially as the era of distance learning offers new possibilities.

Best mentors for my project (up to 3)

Please describe to your best knowledge, what you would expect from a mentor or which type of person would be the best match for you.

Referent/ sponsor

Please indicate which ESA member made you aware of the program

CV (one page)

Please add a one page resume upon your application
